Question 39 **Essay** **0 points**

[Modify](#) [Remove](#)

Question Identify and describe the functions of an accounting system.

Answer The functions of an accounting system are analysis, bookkeeping, and evaluation. Analysis involves analyzing business transactions to determine what information should be captured by the accounting system. Bookkeeping is tracking activities on a day-to-day basis. Evaluation uses summary information to evaluate the financial health and performance of a business.

Question 40 **Essay** **0 points**

[Modify](#) [Remove](#)

Question The definition of accounting is a system for providing "quantitative information, primarily financial in nature, about economic entities that is intended to be useful in making economic decisions." List and explain the key components of this definition.

Answer

Quantitative	Accounting relates to numbers.
Financial	The health and performance of a company are affected and reflected in many dimensions but accounting focuses only on the financial aspect.
Useful	Accounting exists only because it is useful.
Decisions	Accounting is only useful as the past information can be used to impact future decisions.

 3. Identify alternatives.
 4. Select the option that will most likely result in the desired objective.

[◀ Add Question Here](#)

Question 42 **Essay** **0 points**

[Modify](#) [Remove](#)

Question Identify the three primary financial statements and discuss the content of each.

Answer The balance sheet reports the assets, liabilities, and owners' equity of a business.

The income statement reports the net income or net loss of a company, which represents the difference between revenues and expenses.

The statement of cash flows reports the cash inflows and outflows from operating, investing, and financing activities.

[◀ Add Question Here](#)

Question 43 **Essay** **0 points**

[Modify](#) [Remove](#)

Question List six users of accounting information and indicate whether they are an internal or an external user.

Answer

Management	internal
Creditors (Lenders)	external
Investors	external
Suppliers	external
Customers	external
Employees	external
Competitors	external

Government agencies	external
The press	external

[◀ Add Question Here](#)
Question 44 **Essay****0 points**
[Modify](#) | [Remove](#)

Question Lenders, investors, and management are three potential users of external financial statements. Discuss how the information found in external financial statements can benefit each of these external users.

Answer Lenders want to be repaid. External financial statements help lenders predict the future ability of the borrower to repay the loan.

Investors want to be able to estimate how much cash they will receive in the future if they invest in a company now. Financial statements, along with knowledge of business plans, market forecasts, and character of management, can help investors to assess future cash flows.

Management can use the information found in external financial statements to state goals, calculate management bonuses, and analyze the company in order to pinpoint weaknesses.

[◀ Add Question Here](#)
Question 45 **Essay****0 points**
[Modify](#) | [Remove](#)

Question Describe the major difference between internal reports and external reports.

Answer Internal reports are dynamic and created to meet the needs of management. These reports may vary greatly among companies.

External reports generally consist of general-purpose financial statements and must follow certain standards or guidelines. These reports are more uniform among companies.

[◀ Add Question Here](#)
Question 46 **Essay****0 points**
[Modify](#) | [Remove](#)

Question It is often said that companies must keep two sets of books. Isn't this dishonest? Explain.

Answer No, it is not dishonest. Companies are subject to both the rules governing financial accounting and those governing tax accounting. One set of books must be maintained according to GAAP from which the company's financial statements are prepared. The other set of books is maintained in compliance with income tax regulations, from which the company's tax return is prepared.

Question 47 **Essay****0 points**
[Modify](#) | [Remove](#)

Question FASB, GAAP, SEC, CPA, AICPA, IRS, IASB, IFRS are all acronyms used in accounting. For the preceding list of acronyms, state what the acronym stands for and then give a definition of each acronym.

Answer

FASB: Financial Accounting Standards Board. The private organization responsible for establishing the standards for financial accounting and reporting in the United States.

GAAP: Generally Accepted Accounting Principles. Authoritative guidelines that define accounting practice at a particular time.

SEC: Securities and Exchange Commission. The government body responsible for regulating the financial reporting practices of most publicly owned corporations in connection with the buying and selling of stocks and bonds.

CPA: Certified Public Accountant. A special designation given to an accountant who has passed a national uniform examination and has met other certifying requirements.

AICPA: American Institute of Certified Public Accountants. The national organization of CPAs in the United States.

IRS: Internal Revenue Service. A government agency that prescribes the rules and regulations that govern the collection of tax revenues in the United States.

IASB: International Accounting Standards Board. The committee formed in 1973 to develop worldwide accounting standards.

IFRS: International Financial Reporting Standards. The accounting standards produced by the IASB and envisioned to be a set of standards that can be used by all companies regardless of where the company is based.
